

Associate of Arts in Business

About this program

This business degree is designed to substantially fulfill the freshman and sophomore course requirements for admission to bachelor's degree programs in business at colleges and universities.

The degree includes a general education curriculum of 31-35 credit hours, which is accepted for transfer by many colleges and universities throughout New Mexico.

Pursue Your Goals

Throughout this program, students will gain an understanding of the nature of business, including financial information skills. Careers that may require a bachelor's degree in business range widely and include areas such as:

- Accounting
- Financial analysis
- Human resources
- Insurance sales
- Marketing
- Management
- Personal finance
- Recruitment and job placement

Courses

AA Business

Increase your job prospects with an Associate degree in Business. If you have a desire to own your own business or work in a corporate setting this is the place to begin your career.

Composition I

ENGL 1110 - 3 Credits

In this course, you will develop reading and writing skills that will help with the writing required in their fields of study and other personal and professional contexts. Students will learn to analyze rhetorical situations in terms of audience, contexts, purpose, mediums, and technologies and apply this knowledge to their reading and writing.

Fundamentals of Information Literacy and Systems

BCIS 1110 - 3 Credits

You will examine systems and their impact on commerce, education, and personal activities, as well as utilization of productivity tools for communications, data analysis, information management and decision-making.

Composition II

ENGL 1120 - 3 Credits

You will explore argument in multiple genres. Research and writing practices emphasize summary, analysis, evaluation, and integration of secondary sources. The emphasis of this course will be on research methods.

Introduction to Statistics

MATH 1350 - 3 Credits

This course discusses the fundamentals of descriptive and inferential statistics. You gain introductions to topics such as descriptive statistics, probability and basic probability models used in statistics, sampling and statistical inference, and techniques for the visual presentation of numerical data.

Macroeconomic Principles

ECON 2110 - 3 Credits

Macroeconomics is the study of national and global economies. Topics include output, unemployment and inflation; and how they are affected by financial systems, fiscal and monetary policies.

Introduction to Psychology

PSYC 1110 - 3 Credits

This course introduces you to the concepts, theories, significant findings, methodologies, and terminology that apply to the field of psychology.

Business and Professional Communication

COMM 2180 - 3 Credits

This course develops the interpersonal, small group, and public communication skills most useful in business relationships and professional organizations.

Chemistry in Our Community

CHEM 1110/L - 3 Credits

This course will introduce non-science majors to the basic chemistry required to understand topics of current interest affecting their communities, such as air and water quality, global climate change, use of fossil fuels, nuclear power, and alternative energy sources.

Life Science for Teachers

NTSC 1120 - 4 Credits

Uses activities for the study of science topics including botany, cell biology, genetics, microbiology and zoology with emphasis on science processes, inquiry and the integration of technology.

Environmental Science for Teachers

4 Credits

Introduces major issues in environmental science with emphasis on science processes, scientific investigations and field-based activities, and the integration of technology.

College Algebra

MATH 1220 - 3 Credits

This course examines equations, functions and graphs, reviewing linear and quadratic functions, and concentrating on polynomial, rational, exponential and logarithmic functions.

Professional and Technical Communication

ENGL 2210 - 3 Credits

Professional and Technical Communication introduces you to the different types of documents and correspondence created in your professional career. This course emphasizes the importance of audience, document design, and the use of technology in designing, developing, and delivering documents.

General Biology	BIOL 1110/L - 3 Credits
This course introduces non-science majors to basic biological concepts including, but not limited to, the properties of life, biochemistry, cell biology, molecular biology, evolution, biodiversity, and ecology.	
Spanish I	SPAN 1110 - 4 Credits
Designed for students with little exposure to Spanish, this course develops basic listening, speaking, reading, and writing skills and basic intercultural competence in interpretive, interpersonal and presentational modes of communication at the Novice Level of proficiency based on ACTFL guidelines.	
Logic, Reason, Critical Thinking	PHIL 1120 - 3 Credits
The purpose of this course is to teach you how to analyze, critique, and construct arguments. The course includes an introductory survey of important logical concepts and tools needed for argument analysis and composition.	
Business Law I	BLAW 2110 - 3 Credits
Survey the legal environment of business and common legal principles including: the sources of law, dispute resolution and the U.S. court systems, administrative law, tort law, contract law, agency and employment law, business structure and governance, ethics and corporate social responsibility.	
Principles of Acct I	ACCT 2110 - 3 Credits
Get an introduction to financial accounting concepts emphasizing the analysis of business transactions in accordance with generally accepted accounting principles, the effect of these transactions on the financial statements, financial analysis, and the interrelationships of the financial statements.	
Principles of Acct II	ACCT 2120 - 3 Credits
An introduction to the use of accounting information in the management decision making processes of planning, implementing, and controlling business activities. In addition, the course will discuss the accumulation and classification of costs as well as demonstrate the difference between costing systems.	
Introduction to Sociology	SOCI 1110 - 3 Credits
This course introduces you to the basic concepts and theories of sociology, as well as to the methods used in sociological research. The course addresses how sociological concepts and theories can be used to analyze and interpret our social world, and how profoundly our society and the groups to which we belong influence them.	
Calculus	MATH 1430 - 3 Credits
An algebraic and graphical study of derivatives and integrals, with an emphasis on applications to business, social science, economics and the sciences.	
Microeconomic Principles	ECON 2120 - 3 Credits
This course will provide a broad overview of microeconomics. Microeconomics is the study of issues specific to households, firms, or industries with an emphasis on the role of markets	
Introduction to Theatre	THEA 1110 - 3 Credits
This course provides an introduction to the study of theatre. You will examine various components that comprise theatre, such as acting, directing, playwriting, dramaturgy, scenic and costume design, stagecraft, spectatorship, history, theory, and criticism.
